

# Coronavirus Disease 2019 (COVID-19) Update

3/06/2020

As details of the Coronavirus Disease 2019 (COVID-19) unfold many of our clients are wondering what we are doing to keep you and your homes safe.

Like you we are diligently monitoring the Center for Disease Control (CDC) Newsroom for updates and any changes that might affect the way we serve you and your family.

Currently no one on our team has the virus and we trust that your family is free from it as well. We will continue to provide you the same excellent service you are used to from us.

We will also use hand sanitizer before entry and after exiting each customer home as well as wearing disposable gloves while cleaning each home to maintain the integrity of that home without cross contamination.

The CDC suggests that person-to-person spread is possible when one person who is contagious is in close contact with one another (within about 6 feet.) And the disease is spread through respiratory droplets that are produced when an infected person coughs or sneezes.

For your protection while in your home, we will keep our 6-foot distance from you and your pets.

Like you, we too are concerned and will keep you informed if our health status changes.

Thank you for trusting us with your care.

- *Your Cleaning Team*
